

## FEATURES AND BENEFITS

Optically correct lenses reduce distortion and eye fatigue.

Shatterproof and scratch resistant polycarbonate lenses protect your eyes from dirt, sticks, rocks and flying critters (bugs and rodents!)

All of our lenses block 100% of UVA, UVB, & UVC rays, and harmful blue light to 400nm.

Hydrophilic [anti-slip] nose pads and temple tips keep your sunglasses in place and stop them from bouncing or sliding down your nose.

RYDERS EYEWEAR is available in a variety of frame colours, lens tint & lens technologies and is priced from \$39.99 to \$89.99.
